Out of the 1,258 UCSD students who went abroad to study in the 2009-10 academic year, 5 students were from the Physics Department. From your department 5 were undergraduates and zero were graduate students. Details about the types of programs in which your students participated are presented below.

### Academic Integration

The Programs Abroad Office continues to work with departments on the comprehensive integration of study abroad programs and courses into the curricula. This is especially true for students in those fields who have traditionally not thought of study abroad as a viable option. The Programs Abroad Office conducted a survey of 0 Physics majors who participated in study abroad programs over the past five years to better understand their academic integration needs.
